

Part C) Adding below features on current Wordpress site.

->Apply process they will do on wordpress site only.

This is the link of my web site: <https://eshayatabroad.com/>
and the web site that we really inspiring from is: <https://www.eu-startups.com>

Wordpress dashboard where users can add houses or post jobs involves several components. Here's a high-level breakdown of the features you might want to include:

- **User Authentication and Authorization:**
 - Implement a secure user authentication system to allow users to register and log in.
 - Define user roles and permissions to control access to specific features.
- **User Profiles:**
 - Enable users to create and manage their profiles.
 - Include features such as profile pictures, contact information, and other relevant details.
- **House Listing Feature:**
 - Create a form for users to add details about their houses.
 - Include fields such as location, size, number of rooms, amenities, and images.
 - Implement a search and filter functionality for users to find houses based on specific criteria.
- **Job Posting Feature:**
 - Develop a form for users to post job listings.
 - Include fields such as job title, description, required skills, location, and contact information.

- Implement a search and filter functionality for users to find jobs based on specific criteria.
- **Dashboard Interface:**
 - Design a user-friendly dashboard that displays relevant information.
 - Include sections for house listings, job postings, and user activities.
 - Implement notifications for users regarding new messages, applications, or updates.
- **Messaging System:**
 - Integrate a messaging system to facilitate communication between users interested in houses or job listings.
- **Payment System (optional):**
 - If you plan to monetize the platform, integrate a secure payment system for features like premium listings or job promotions.
- **Newslettter**
 - We want to write in our page news .
- **Responsive Design:**
 - Ensure the dashboard is responsive and accessible on various devices, including desktops, tablets, and mobile phones.
- **Security Measures:**
 - Implement security best practices to protect user data and prevent unauthorized access.
